### EDUCATION

2017-2019

SAIFIYA HIGH SCHOOL

- Matric SSCII
- Percentage : 70.00%
- Grade : A

2019-2021

TABS CAMBRIDGE SCHOOL  
AND COLLEGE

- HSCII (Pre-Engineering)
- Percentage : 78.09%
- Grade : A

### SKILLS

- Flutter Framework
- Dart Programming
- UI Designing
- Integration of App Widgets
- Firebase
- State Management with GetX
- API integrates (Google maps API)
- Mobile performance optimization

### LANGUAGES

- English (Communication)
- Urdu (Native)
- Arabic (Intermediate)

### PROFILE

I am fully committed towards my work as a Flutter Developer as I have been working in the field of mobile app development, since the very beginning. I have decent knowledge of Dart, and of the Flutter framework too, developing different kinds of mobile applications like an ecommerce food app for food ordering and a mobile app for movie watching. I always strive to deliver high performance, engaging, and aesthetically helpful interface and work hard to follow the industry trends and standards.

### WORK EXPERIENCE

#### ● DOTCOM Institute of IT

Ambulance Booking App

- Developed a Flutter-based app enabling ambulance bookings from hospitals.
- Integrated real-time notifications and admin management features.
- Implemented AI chatbot for user support and emergency responses.
- Created a chat system for user-admin interaction on accepted requests.
- Designed a streamlined user interface with enhanced accessibility.

#### ● Food App

Flutter Framework

- Developed a Flutter-based food delivery app with order management, real-time updates, and payment integration.
- Implemented clean UI/UX with dynamic product listings, user authentication, and secure data handling using GetX and Firebase.
- Integrated image caching for optimized performance and low data usage.
- Created Admin and Business User panels for managing orders, deliveries, and app operations.
- Used Google Maps API for real-time location tracking and navigation.

#### ● Attendance Management System

Flutter Framework

- Created an Attendance Management System with Flutter for efficient tracking and leave management.
- Utilized Firebase Firestore for real-time updates on attendance, leave requests, and reports.
- Designed a professional Admin Dashboard for managing records and tracking user performance.
- Integrated automation to mark absences if attendance isn't recorded by day's end.
- Implemented a grading system to evaluate performance based on attendance.
