PROFILE

I am a passionate and dedicated Flutter Developer with a strong foundation in mobile app development. I have honed my skills in Dart programming and the Flutter framework through coursework and personal projects. My enthusiasm for creating seamless, responsive, and visually appealing mobile applications drives me to stay updated with the latest industry trends and best practices.

MY WORK

Movie App

Flutter Framwork

- First of all I have created Sign Up and Login process with Firebase by Storing User data in Database including Profile Picture.
- Second I used Drawer to show profile and other function I might add in future.
- Third I added Tabs bar with some Styling to Navigate through Tabs.
- Finally I made Home Page where I showed all the movies to show and yes I had to make Movie Player for that and I provide Link from other webs to play Movies without annoying ads.
